

SPECIFICATIONS – SteamVection Steam Head

Construction..... Brass
Aromatherapy..... Integral Reservoir

Installation Notes:

The steam head should be installed 24 inches from the floor, and 6 inches from any corner, inside the shower only, and as far away from the controller and shower fixtures as possible.

The steam head housing requires a 1-1/8" hole in the shower wall, and must be flush with the finished wall and sealed to the wall to not allow vapor or water behind it. Use 1/2" copper fittings to attach the housing to the steam outlet. See the full steam head housing instructions within your generator installation guide.

Product Specification:

The steam head shall be approximately 1.75" x 1.75" in the square version, and a 1.75" Dia. For the round version. The steam head is made from brass alloy and includes an aromatherapy well.

Finish Chart:

Select desired finish and replace XX with code. No-Touch Aromatherapy steam head and control finishes.
